

Over the past 5 years, cloud adoption has grown considerably as organizations have migrated from on-premise and private cloud hosting to the cloud.

**Private Cloud deployments decreased** significantly in just 2 years,

**53%** ▶ 15% in 2017

in 2019

as organizations move to the cloud.1

The cloud provides compelling advantages for financial services companies:

Zero footprint Scalability Fully managed Predictable cost

Robust security Future proof

Resiliency & Recovery

All of these advantages allow for increased business agility and maximized performance in a competitive marketplace.

that the cloud significantly boosts agility and efficiency:

A 2019 AWS Benchmarking Survey found

## Faster speed to market

**Business Agility** 

**30.3%** 431.5% reduction in time increase in code to market

deployment frequency

**Cost Savings** Lower TCO

reduction in Cost per User

**Staff Productivity** 

per Administrator

83.4% increase in Virtual Machines increase in Terabytes

More computing power

**Operational Resilience** 

per Administrator

decrease in mean time to resolution

Fewer incidents + faster resolution 4.7% **37.2%** 

As they fully map their

cloud migration strategies,

61% of organizations now use

hybrid environments that

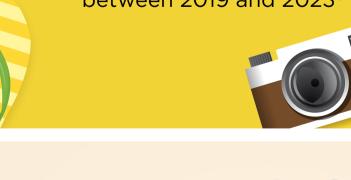

services and infrastructure

mix both private and

public cloud services<sup>2</sup> Spending on public cloud

between 2019 and 20233

will more than double

Considering a move to the cloud? V3locity is Vitech's cloud-based platform for

administration, engagement & analytics. V3locity's advanced, cloud-native architecture leverages the capabilities of AWS for state-of-the-art security, scalability, and resiliency.
